Pentech ICM2000

Industrial Coatings Mixer

Developed to mix MIL-SPEC nonskid deck coatings, Pentech's ICM2000 has the power to completely mix thick coatings containing abrasive materials.

Pneumatic clamps securely hold the container while a spring loaded splash ring minimizes spills from high speed mixing.

It works.

- Consistently Superior Mix to comply with ASTM F-718 NAVSEA standards.
- Unique patent pending blade design.
- **Mixes entire container** including chine area to provide 100% usability of contents. COMPLETE MIX eliminates unusable materials.
- **Reduce operator error**, ensure consistency and complete mix by using a programmable timed mixing cycle.
- Designed for the most demanding applications.
- Variable speed control, 0 - 175 RPM.
- Pneumatic clamping securely holds the container keeping the operator's hands away from the mixing blade to **increase safety** and **reduce operator fatigue**.
- Simple to operate.
- Easy to clean.
